EXPERIENCE

Software Developer

INFINITY TRANSOFT SOLUTION PVT.LTD.[ITSPL]

June 2021 - present Gujarat, India

- Developed and deployed **web-based applications** using **React.js**, **ASP.NET Core**, and **RESTful Web APIs**, ensuring seamless frontend-backend integration and optimized performance.
- Designed and implemented **Microservices architecture** in **.NET Core**, improving scalability, modularity, and independent deployment of services.
- Created and managed **SQL Server databases**, including **tables**, **views**, **stored procedures**, and **functions**, to ensure efficient data access and security.
- Architected and maintained a **new website structure** with a focus on performance, reusability, and clean API design.
- Worked on **legacy ASP.NET Web Forms applications**, performing enhancements, debugging, and modernizing components for better maintainability and integration with newer technologies.
- Handled complete **.NET website operations** and introduced a newer website using **React.js**, ensuring improved user experience and smoother system workflows.
- Experienced in integrating **Payment Gateways (PGs)**, working with **SOAP** and **XML-based APIs**, and implementing multiple **Third-Party APIs**.
- Proficient in **ReactJS Function-Based Components**, developing reusable and optimized UI components for scalable frontend architecture.
- Experienced with version control tools like **GitHub** and **GitLab**, ensuring smooth collaboration and CI/CD workflows.
- Strong in **problem-solving**, **communication**, and debugging complex technical issues across both frontend and backend systems.

TECHNICAL SKILLS

React Angular JS C# Java C++ HTML
CSS JavaScript JQuery MySQL MSSQL
Git/GitHub Asp.Net Core MVC Vercel Asp.Net Core
Firebase Asp.Net Core Web API

RELEVANT COURSE

- Data Structure
- Algorithms
- Database Management System
- Computer Networks
- Operating System

EDUCATION

Bachelor of Science (IT)

Atmiya University

June 2018 – May 2021

Higher Secondary

Sarvodaya Science School

June 2014 – May 2016

PROJECTS

Chatify – GitHub

- Chatify – Real-Time Messaging Web Application**
Tech Stack: React.js, Firebase, Material UI, React Icons
 - Developed a real-time **group messaging application** with seamless user experience using **React.js** and **Firebase**.
 - Implemented secure and fast **Google Sign-In authentication** for effortless user onboarding.
 - Built functionality to **create and manage chat rooms**, enabling structured and multi-room conversations.
 - Enabled **realtime messaging with image sharing** using Firebase Firestore and Storage for instant data synchronization.
 - Integrated **emoji support** and **message reactions** to enhance user interaction and engagement.
 - Designed a modern and responsive interface using **Material UI** with clean visuals and intuitive navigation.

Personal Portfolio Website –

GitHub

- Tech Stack:** React.js, Node.js, Express.js, CSS3, React-Bootstrap, JavaScript, GitHub, Vercel
- Developed a modern and fully responsive personal portfolio website to professionally showcase projects, technical skills and resume details.
- Reusable and modular React components built with optimized routing structure to improve maintainability, scalability, and user navigation experience.
- Integrated GitHub repositories, project showcase sections, contact information, and downloadable resume functionality for better recruiter access.
- Managed source code using GitHub and deployed the application on Vercel with seamless hosting and continuous deployment workflow.
- Followed modern frontend development best practices, including reusable code structure, responsive layouts, and cross-browser compatibility.
